

CENSUS, REDISTRICTING & VOTING

MOVING COMMUNITIES TOWARDS A VIBRANT FUTURE

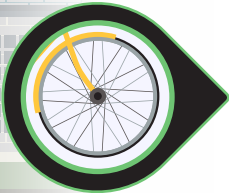

CENSUS

Like a bike's chain, the census connects government to communities. Accurate counts impact everything from representation to funding for schools, healthcare, and housing.

REDISTRICTING

Redistricting redraws district lines after every census. When district maps are unfair, communities lose their voice in electing the leaders who shape policies that affect their lives.

VOTING

When all voters can cast their ballots fairly, communities steer toward the future they want by electing leaders who represent their needs.

CIVIC PARTICIPATION

Just like a bike needs a rider, democracy needs an engaged public to move forward.

A TEAM EFFORT

A good support team – nonprofits, experts, donors, government, and the public – can help keep the bike working and power communities forward.

Cleaner air, water, and renewable energy

Better schools, healthcare, housing

More local businesses and jobs

More libraries, parks, and community centers

Better roads, bridges, internet access, grocery stores

THE ROAD TO STRONG, THRIVING COMMUNITIES
